

First Aid Kits

"Semper Paratus"

By Swineson of Head Clan

I try every winter to evaluate my supplies and equipment for the coming medieval year. It so happens I noticed my first aid kit has been showing some wear and tear for supplies. I am not sure what I had before and therefore had to make a list for my kit. To some this may seem a deluxe version of a first aid kit, but it can also be used as a household kit. I am not trying to act like a doctor or a nurse in the future, but rather be prepared for a possible situation. I feel more comfortable in having the item and not using it, than to wishing I had an item. You can adjust the size of the kit to your liking.

As always, discretion on medication to a stranger or a child is **always** advised due to drug reactions, dosage, and liabilities. Remember to use common sense when giving First Aid or handing out your kit to someone giving aid.

For further information contact the Leach Guild or the Red Cross.
